myMINIGLASS  
ONLINE CONFIGURATOR

## MyMINIGLASS WALL CONFIGURATOR – INSTRUCTIONS FOR USE

### • BACKGROUND COLOR

Click on Background  to choose the color of the background wall.

Scroll through the bar to the right of the palette to choose the color and click on the left square to select the preferred shade. Click outside the palette to confirm the background.

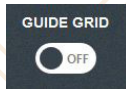

### • TEMPLATE

Click on Template and choose from 10 predefined walls.

### • AUXILIARY GRID

Activate the grid (button ON) if you want to have a base grid of the wall as a guide when making any changes you will carry out (max 6 horizontal glass x max 14 vertical glass).

### • BLOCK TYPE

Choose the MyMINIGLASS format according to the changes you want to make to the chosen wall.

### 1. Do you want to delete one or more vertical or horizontal MyMINIGLASS rows?

Choose the Classic format  that can be used both internally and at the edge of the wall.

**If the glass block is coloured, double-click on the first block at the top of the wall** and then proceed vertically or horizontally depending on the row of glass blocks you want to eliminate.

**Only one click if the glass block is clear.**

Continue this process until the desired MyMINIGLASS wall measurement is obtained.

### 2. Do you want to replace/insert the last horizontal and vertical row with MyMINIGLASS special pieces?

If you should replace MyMINIGLASS Classic with linear end, you must first delete the external rows as per point 1.

Now choose the linear end for left or right side   and click from bottom to top to insert the new external vertical rows on the left and/or right.

Now choose the linear end top side  that can only be used to insert the last horizontal row on the top of the wall.

### 3. Do you want to replace MyMINIGLASS at the corner of the wall after inserting linear end in the last horizontal row and in the last vertical rows?

Choose double end formats   that can be used at the left or right corner of the last one horizontal row.

**PLEASE NOTE THAT THE DOUBLE END GLASS BLOCK TYPE CAN ONLY BE COMBINED WITH THE LINEAR END YOU CAN INSERT DOUBLE END ONLY AS A LOCK/INTERSECTION OF TWO LINEAR END ROWS. (vertical row + horizontal row).**

#### 4. Do you want to change color to MyMINIGLASS blocks?

Click on COLOR  and choose among the 7 colors available.

Click on the MyMINIGLASS whose color you want to change.

#### 5. Do you want to create a wall with a single color of MyMINIGLASS?

Click on COLOR  and choose among the 7 available colors then click on PAINT ALL BLOCKS  and yours wall will have a unique color.

#### 6. Do you want to watch your MyMINIGLASS wall laterally?

Click on the two icons at the bottom to rotate the wall to the left  or to rotate it to the right. 

**Have you finished designing your MyMINIGLASS wall and want to save it?**

**Do you want to know how many glass blocks and what material do you need to make your MyMINIGLASS wall?**
